

DVR-F800PRO

Firmware Update Procedure

Update procedure

1. Download the „**DVR-F800PRO_ver1.004.zip**“ file to your computer, for example into folder for Downloads.
2. Unzip the downloaded zip.file and you will find a „**F800PRO_boot.bin**“ file and a „**F800PRO_pkg.bin**“ file on your computer.
3. Take the Memory Card out of the Dash Cam.
4. Insert the Memory Card into your computer and open the Memory Card content.
5. Copy the „**F800PRO_boot.bin**“ file and the „**F800PRO_pkg.bin**“ file to the root folder of the Memory Card.
6. Take the Memory Card out of your computer and put it back into the Dash Cam.
7. The new firmware starts automatically after ACC ON or after starting the engine. The system will restart once the firmware update is completed.
